LED Single Lamp Vanity

START FROM HERE

• Make sure power is completely off at the fuse box.
• Have your fixture installed by a qualified licensed electrician
• Prepare everything in a clear area.
• Wear gloves at all times during this installation.
• Read instructions carefully before you start assembly.
• Keep this instruction sheet for future reference.
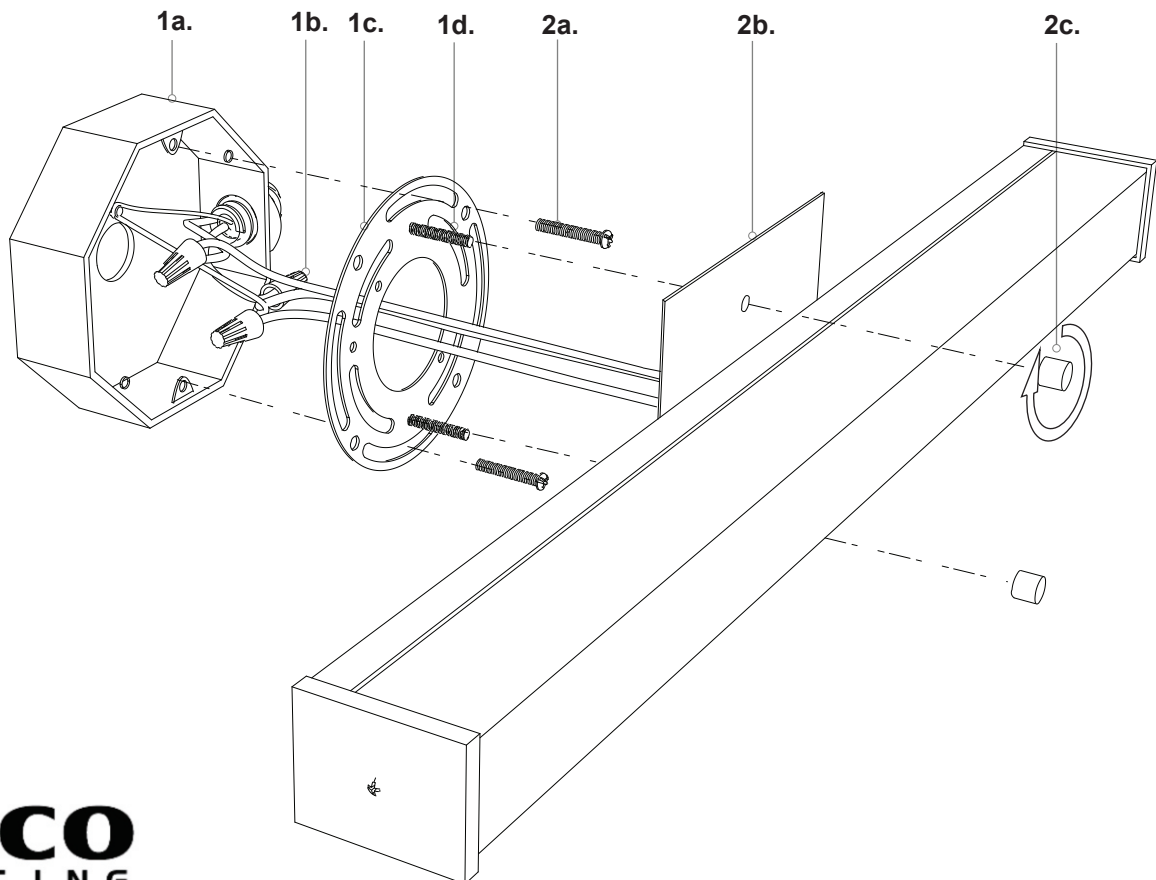

Technical Support: 1-877-452-6858

Please Note:
• All Kuzco LED fixtures come with pre-wired LED module(s).
• Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
• For dimming, an ELV (Electronic Low Voltage) type of dimmer is required.

---

1. Remove the fixture from its original packaging. Remove decorative nuts **(2c)** from the mounting plate **(1c)** and attach the mounting plate to the electrical junction box **(1a)**, using the two screws **(2a)** provided in the hardware package.

2. Attach the canopy backplate **(2b)** to the mounting plate **(1c)**. First attach all wiring **(1b)** with the provided marrets (white to white "N", black to black "L", ground to ground "G"). Now push the canopy backplate **(2b)** onto the mounting plate **(1c)** allow screws **(1d)** to pass through the backplate **(2b)** holes. Next, thread nuts **(2c)** onto screws **(1d)** this will secure the fixture to the wall.

3. You have now completed the installation of your fixture, enjoy.

NOTE: To avoid a gap between the canopy and wall insure the junction box (1a) has a countersink of a minimum of 1/8" behind the drywall.

1a.   **1b.**   **1c.**   **1d.**   **2a.**   **2b.**   **2c.**
