

START FROM HERE

- Make sure power is completely off at the fuse box.
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in a clear area.
- Wear gloves at all times during this installation.
- Read instructions carefully before you start assembly.
- Keep this instruction sheet for future reference.

Technical Support: 1-855-855-8926

Please Note:

- All Kuzco LED fixtures come with pre-wired LED module(s).
- Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
- For dimming, an ELV (Electronic Low Voltage) type of dimmer is required.

- 1.** Remove the fixture from its original packaging. Next, remove the mounting plate (1c) from the body fixture (2e) by removing the screws (2a). First, secure the mounting plate (1c) to the electrical junction box (1a) with screws (1d) provided in the hardware package.
- 2.** First connect all wires (1b) correctly black to black "L", white to white "N" and the ground wire with provided marrettes from the hardware package. You are ready to assemble the body fixture (2e) and glass (2f). Align the holes in the mesh covers (2d) to the fixture body (2e) and secure with the screws (2c). Next, secure the glass (2f) to the body fixture (2e) with screws (2b).

- 3.** Slide the bottom of the mounting plate (1c) into the fixture body (2e). Next, align the holes at the top of the fixture body (2e) and mounting plate (1c) and install the screws (2a) to secure the fixture body to the mounting plate.
- 4.** You have now completed the installation of your fixture, enjoy.
