IMPORTANT SAFETY INSTRUCTIONS

SAVE THESE INSTRUCTIONS

TOOLS AND MATERIALS REQUIRED:

Phillips
Screwdriver

Wire Cutters

Pliers

Wrench

Wiring supplies
as required by
local electrical
code

SAFETY PRECAUTIONS:

1. TURN OFF ELECTRICAL POWER BEFORE STARTING INSTALLATION OF LIGHT FIXTURE.
2. THIS PRODUCT MUST BE INSTALLED IN ACCORDANCE WITH THE APPLICABLE INSTALLATION CODE BY A PERSON FAMILIAR WITH THE CONSTRUCTION AND OPERATION OF THE PRODUCT AND THE HAZARDS INVOLVED.
3. CONNECT THE GROUND WIRES (BARE COPPER OR GREEN) FROM YOUR FIXTURE TO THE GROUND WIRE (BARE COPPER OR GREEN) OR GROUND SCREW IN THE ELECTRICAL BOX.
4. TO CLEAN THE FIXTURE, TURN OFF THE POWER, WAIT FOR IT TO COOL, AND WIPE THE FIXTURE WITH A CLEAN, SOFT CLOTH.

NOTE: Product may not look exactly as shown in figures.

INSTALLATION:

1. Screw the center rod to the fixture.

2. Feed the wires through the center hold of the shade and the lower loop.

3. Tighten the lower loop to the center rod. Tighten the locking screw on the lower loop using the tool provided.

4. Determine the height that you would like to hang your fixture. Trim the cord and chain. Allow 10" of extra wiring for the electrical box connections. Remove the nut from upper connector. Loosen the upper connector from stud.

5. Attach the mounting bracket to the electrical box using electrical box screws (not included). Attach the stud to the mounting bracket and adjust until it will clear the canopy when assembled (Place the canopy over the stud and tighten the upper connector onto the stud until snug. The upper connector should hold the canopy snug to the ceiling). Lock the stud in the correct position using the hex nuts.

6. Loosen the nut on the upper connector. Weave the power cord and fixture ground wire through the chain, the nut and the canopy.

7. Connect the chain to the lower loop and the upper loop on the upper connector using the two quick link. **Seal the opening on the quick link by screwing the nut.**

8. Slide the nut and canopy down the chain towards the lower connector. Thread the power cord and fixture ground wire through the center of the upper connector and onto the stud. Tighten the upper connector onto the stud.

9. Connect the ground wires (bare copper or green) from your fixture to the ground wire (bare copper or green) or ground screw in the electrical box. Connect the black wire (or wire marked "SPT-1") from the fixture to the black wire in the electrical box and connect the white wire (or the wire with ribbed side) from the fixture to the white wire in the electrical box.

10. Once connections of wires are completed, carefully tuck wires and wire nuts into the electrical box making sure no bare wire (on the black and white) is visible at the wire nuts.

11. Slide the canopy up the chain and over the upper connector. Slide the nut up the chain and thread onto the upper connector.

12. Install specified bulb type and wattage (not included).
