

LUMINAIRE

Galarneau

Product Specification

Quick Connector of LED strip

10mm FPC 2PIN All in one quick Connector

WW-FLS102B-MUCN-10

Product Features

- Dimension: 17.4 X 11.6 X 5.3mm (0.68 x 0.45 x 0.209inch)
- Operating temperature: -10°C ~ +45°C (-14°F ~ +113°F)
- Storage temperature: 0°C ~ +60°C (32°F ~ +140°F)
- Humidity: 30-70%RH
- IP Grade: IP20
- Input Voltage: Max.36V
- Current capacity: Max.5A
- Color: Transparent
- Applied to the 10mm width COB strip

Dimension Drawing

Unit: mm

Tolerance: $\pm 0.2\text{mm}$

Packaging Diagram

Packaging Information

IP Grade	Packing bag		Outer carton		N.W	G.W	Outer carton volume
	Bag size	PCS/Bag	Size	pcs/ctn			
B 20	140*140 mm	100	440*400*260mm	10000	8.8 KG ±10%	9.7 KG ±10%	0.04576 m ³
	5.51*5.51 in	100	17.3215.75*10.24in	10000	19.4 Lbs ±10%	21.38 Lbs ±10%	1.616 ft ³

Remarks :

- Please contact our sales account manager for customized package (color box, blister etc.)

Installation guide

1: Connecting wires

- (1): Insert the wires separately
(2): Press the metal piece with tools

2: Connecting wires to LED strip

- (1): Insert the wires
(2): Insert the LED strip
(3): Press the metal piece with tools

Installation guide

3: Connecting LED strip to LED strip

- (1): Insert the LED strip
- (2): Press the metal piece with tools

4: Connecting LED strip to LED strip in L-shape

- (1): Insert LED strip 1
- (2): Insert LED strip 2
- (3): Press the metal piece with tools

5: Connecting wires to LED strip in L-shape

- (1): Insert LED strip 1
- (2): Insert LED strip 2
- (3): Insert wire 3
- (4): Press the metal piece with tools

6: Connecting LED strip to LED strip in T-shape

- (1): Insert LED strip 1
- (2): Insert LED strip 2
- (3): Insert LED strip 3
- (4): Press the metal piece with tools

Installation guide

7: Connecting wires to LED strip in T-shape

(1): Insert LED strip 1 through the connector

(2): Insert LED strip 2

(3): Insert wire 3

(4): Press the metal piece with tools

8: Connecting LED strips in X-shape

(1): Insert LED strip 1 through the connector

(2): Insert LED strip 2

(3): Insert LED strip 3

(4): Press the metal piece with tools

9: Power ports

(1): Install the connector at the end of the LED strip and connect to the power supply to solve the voltage drop issue supply at the middle and end of the LED strip.

Remark:

1: Before connecting the LED strip, ensure that all positive and negative poles are connected correctly

2: Rated wires: 0.35-0.5mm² or 20-22AWG and OD<1.8mm

Cautions

IP20		IP54		IP65		IP67		IP68	
	Do not press the surface of LED		Pay attention to high temperature environment		Do not use in strong water waves environment		Resist strong water waves impact		Can apply to underwater do not deeper than 1m
	Pay attention to damp -proof and dustproof		Do not apply to rainy environment		Can be applied to rainy environment		Do not apply to underwater environment for a long time		No direct sunlight

	Do not tie a knot		Do not winding		Do not twist		Do not cut when it is working		Recommended the continuous working time do not exceed 12 hours daily		Operating temperature -20°C ~ +45°C (-4°F ~ +113°F)		Storage temperature 0°C ~ +60°C (32°F ~ +140°F)		Operated by professionals
--	-------------------	--	----------------	--	--------------	--	-------------------------------	--	--	---	---	--	---	--	---------------------------

	Pay attention to the application environment		IP Level will change after cutting		Do not pull and crash		Connected to power supply every 5 meters		Power supply must be connected to ground(GND)		The minimum bending diameter > 60mm		Power supply retain > 20%		Note the positive and negative poles
---	--	---	------------------------------------	---	-----------------------	---	--	---	---	--	-------------------------------------	---	---------------------------	---	--------------------------------------

For cutting LED strip operation, it is necessary to use the standard accessories provided by Dilux (e.g. DC wire, end-cap, front-cap, adhesive, etc.), and according to the correct cutting and connecting method for the installation.

For avoiding LED get vulcanized, LED strip should be installed in the environment where does not has oil and corrosive substances. Such as these substances which contain Sulphur, Bromine, Iodine and Chlorine. Some other chemical elements which will cause Aromatic hydrocarbons releasing(such as: methylbenzene, xylene, methyl acetoacetate Ethyl acetate etc.).The environment in which includes strong acid and strong base.

During the warranty period, only defective products are acceptable to be replaced by the factory. Factory is not responsible for other expenses because of replacement, such as transportation fee, installation fee, etc..

** If you do not follow the above "Cautions" to operate and result in damaging the product, the factory will not accept maintenance and return.

**The right of final interpretation is owned by Dilux.
