#### INFO

Additional Info:	The lamp has an integrated motion-activated sensor designed to activate between dusk and dawn. It remains inactive in the absence of motion but turns on for a duration of 5 minutes once motion is detected. This functionality can be overridden by toggling the bulb's switch on and off twice within a span of 3 seconds, allowing it to remain continuously illuminated like a standard light bulb.
Specification Note:	Dual Mode Capable: Motion or On-Off Switch
Installation Note:	To achieve optimal sensor reading, make sure the sensor is facing the desired motion area within proper distance and angle.
