Safety Precautions

READ AND SAVE THESE INSTRUCTIONS.

1. Turn off power at main electrical service box before starting installation. ¹⁴
2. Electrical connections must comply with local code ordinances, national electrical codes, CEC, NEC and ANSI/NFPA 70. ¹³
3. Make sure the installation site you choose allows the fan blades to rotate freely without any obstructions.
4. When mounting the fan on a ceiling outlet box, Use an approved (CSA for Canada and UL for U.S.) ceiling fan box marked "FOR FAN SUPPORT". Ensure the outlet box is securely installed in place such that it is able to support at least the fan weight.
5. **WARNING:** To reduce the risk of fire, electric shock, or other personal injury, mount fan only on an outlet box or supporting system marked acceptable for fan support of 35 lbs (15,9 kg) or less and use the mounting screws provided with the outlet box. Most outlet boxes commonly used for the support of lighting fixtures are not acceptable for fan support and may need to be replaced. Consult a qualified electrician if in doubt.
6. The fixing means for attachment to the ceiling such as hooks or other devices shall be fixed with a sufficient strength to withstand 4 times the weight of the ceiling fan. ⁷
7. The mounting of the suspension system shall be performed by the manufacturer, its service agent or suitably qualified persons. ⁸
8. This ceiling fan is pre-built with luminaire. Do not use any other luminaire for this fan. ⁹
9. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. ¹
10. Children should be supervised to ensure that they do not play with the appliance. ²

WARNING: To reduce the risk of personal injury, DO NOT bend the blade brackets when installing the brackets, balancing the blades or cleaning the fan. Also, DO NOT insert foreign objects in between rotating fan blades. ¹⁰

WARNING: To reduce the risk of fire, electric shock, or personal injury, mount to outlet box marked acceptable for fan support and use mounting Screws provided with the outlet box. ¹¹

WARNING: Mount with the lowest moving parts at least 2.10 Meters (7 Feet) above floor or grade level

WARNING: DO NOT operate reversing switch while fan blades are in motion. Fan must be turn off and rotating blades stopped completely, operate reverse switch and then operate speed switch for the opposite direction.

WARNING: Remove fan from the carton carefully and check for shipping damage. Check blades for bends and dents. In case assistance is required please contact our service centre.

WARNING: All set screws must be checked and retightened where necessary, before and after installation.

WARNING: To reduce the risk of personal injury install the safety cable (per step 4).

WARNING: Used Batteries must be disposed of according to your local recycling regulations, many retail outlets provide special battery recycling drop off boxes.

WARNING: Do not mix battery types or voltages to avoid personal injury and/or damage to the fan and remote control.

WARNING: Direct wiring to an external variable speed wall control or dimmer switch of this fan and or external light kit will void warranty and make fan and light inoperable

WARNING: Do NOT install this fan with variable speed wall control or wall-mounted dimmer switch. It will permanently damage the fan's remote control and cause the fan's function to fail.

ON / OFF switch

NO Variable speed wall control

NO Dimmer switch

Warranty

5 YEAR LIMITED WARRANTY

“Thank you” for purchasing our product. It is our policy to furnish you with high quality products at a fair price. With proper installation your fan should provide you with years of money saving comfort.

This fan is guaranteed to be free from defects in workmanship and Material for a period of five (5) years from date of purchase. Within the first (1) year from date of purchase any defective product should be returned to your **RETAIL OUTLET** along with proof of purchase. For the balance of the warranty, four (4) years, the **MOTOR WINDINGS ONLY** shall be free of defects. We will correct such defects or replace the motor assembly at our option if the product is returned, **FREIGHT PREPAID**, to us. The returned fan must be accompanied by your proof of purchase and a cheque for \$20.00 for handling and labour charges. All costs of removing and re-installing the product are **YOUR RESPONSIBILITY** damage to any part as such by accident, misuse, improper installation or by affixing any accessories **IS NOT** covered by this warranty. As a result of varying climatic conditions in your area this warranty does not cover any changes in finishes, including rusting, pitting, corroding, tarnishing or peeling. **WARRANTY VOID: In cases of alteration, abuse, installation not in accordance with instructions or REMOVAL Of the CSA Sticker.**

Pre-Installation

SPECIFICATIONS

Size	Speed	Volts	Amps	Watts	RPM	CFM	Net Weight	Gross Weight	Cube Feet
52 in.	Low	120	0.28	17.2	88	1852	17.2 lb (7.8 kg)	20.28 lb (9.2 kg)	2.03 cu.ft.
	Medium		0.39	34.8	134	2954			
	High		0.50	60.3	184	4155			

NOTE: These are approximate measures. They do not include the amps and wattage used by the light kit.

TOOLS REQUIRED

Phillips screwdriver

Flat blade screwdriver

Adjustable wrench

Electrical tape

Wire cutter / stripper

Step ladder

Pre-Installation (continued)

HARDWARE INCLUDED

NOTE: Hardware not shown to actual size.

AA

BB

CC

DD

EE

FF

GG

Part	Description	Quantity
AA	Rubber bushing	1
BB	Rubber gasket	2
CC	J-Hook	1
DD	Flat washer	13
EE	Fiber washer	13
FF	Blade bracket screws	13
GG	Temporary hook	1

PACKAGE CONTENTS

Part	Description	Quantity
A	Mounting bracket c/w ground wire	1
B	Ceiling canopy	1
C	Ball/Downrod assembly	1
D	Yoke cover	1
E	Motor assembly	1

Part	Description	Quantity
F	Blade	4
G	Diffuser	1
H	Remote control (Includes Transmitter & Receiver & Wall bracket & wire nuts & screws)	1

Assembly

1 MOUNTING BLADES TO MOTOR

- a Remove the cover on the top housing.

- b Attach the blades (F) to the fan motor (E) assembly using the blade bracket screws (FF), metal washers (DD) and fiber washers (EE).

- c Re-attach the cover on the top housing.

2 PREPARING FOR MOUNTING

- Release the mounting bracket (A) from the canopy (B) by removing the two screws (marked "a" on diagram) and washers, and loosening the two screws (marked "b" on diagram) and washers.

3 ASSEMBLING THE FAN

a DOWNROD MOUNT

- Remove the hemisphere from downrod (C) by loosening the hemisphere jam screw and lock pin.
- Remove bolt, flat and cotter pin from the yoke. Slightly loosening the 2 jam screws on the yoke.
- Route the wires and safety cable through the downrod (C) and screw the downrod (C) into the yoke and align holes for the bolt to go through. **Ensure not to damage the wires.** Place the flat washer and cotter pin to lock the bolt. Re-tighten the 2 jam screws on the yoke.

a DOWNROD MOUNT

- Slide the yoke cover (D), rubber ring and canopy (B) into the downrod (C).
- Re-attach the hemisphere into the downrod (C). Insert the lock pin through the hole of downrod (C) and put the lock pin in place on the hemisphere.
- Tighten the hemisphere jam screw against the downrod (C).

b FLUSH MOUNT

- Remove the rubber ring from the canopy (B).

b. FLUSH MOUNT

- Remove the yoke screws and lock washers which correspond to the holes in the canopy (B).
- Remove the bolt, flat washer and cotter pin on the yoke.
- Place canopy (B) on fan housing by aligning 3 larger holes of canopy (B) over 3 existing screws on the motor housing. Secure canopy (B) to motor (E) housing by placing 3 screws and washers (removed in the previous step) in the 3 smaller holes in the canopy (B). Ensure to place the rubber bushing (AA) between the canopy (B) and motor (E).

Assembly (continued)

4 INSTALLING THE MOUNTING BRACKET

WARNING: To Reduce The Risk Of Fire, Electric Shock, Or Personal Injury, Mount To UL/CSA Listed Outlet Box Marked Acceptable for Fan Support And Use Mounting Screws Provided With The Outlet Box.

a DOWNROD MOUNT

- Install the J-Hook (CC) through center of the outlet box and into the wood joist.
- Secure the mounting bracket (A) and rubber gaskets (BB) to the outlet box.
- Hang downrod mount, fan on mounting bracket (A) by aligning tab on mounting bracket (A) with groove in hanger ball on downrod.
- Hang the fan on the mounting bracket (A).

b FLUSH MOUNT

- Install the J-Hook (CC) through the center of the outlet box and into the wood joist.
- Secure the mounting bracket (A) and rubber gaskets (BB) to the outlet box.
- Hang the safety cable onto the J-hook (CC).
- Hang the temporary hook (GG) on the mounting bracket (A). Hang the fan on the temporary hook (GG).

5 ENGAGING THE HEMISPHERE (Downrod Mount Only)

- Carefully rotate the fan assembly until the groove in the hemisphere locks over the tab of the mounting bracket (A) assembly.

WARNING: Failure to seat the tab in the groove could cause damage to electrical wires and possible shock or fire hazard.

NOTE: When installing the fan on a sloped ceiling, make sure the tab on the hanger bracket faces towards the top of the slope. Depending on the slope, a longer downrod may be required to prevent fan blades from hitting the ceiling.

6 ELECTRICAL HOOK-UP

Direct wiring to an external variable speed wall control or dimmer switch of this fan and or external light kit will void warranty and make fan and light inoperable.

- a □ Make the following wire connections to the receiver unit using the wire nuts supplied.
 - Connect GREEN fan wire to BARE (ground) wire.
 - Connect WHITE receiver unit wire (MOTOR N) to WHITE fan wire.
 - Connect BLACK receiver unit wire (MOTOR L) to BLACK fan wire.
 - Connect BLUE receiver unit wire (FOR LIGHT) to BLUE light wire.
 - Connect BLACK receiver unit wire to BLACK supply wire.
 - Connect WHITE receiver unit wire to WHITE supply wire.
 - After making the wire connections, ensure the wires should be spread apart with the grounded conductor and the equipment-grounding conductor on one side of the outlet box and the ungrounded conductor on the other side of the outlet box. ¹⁵
 - Ensure the splices after being made should be turned upward and pushed carefully up into the outlet box. ¹⁶

In Quebec, the installation of this product must be carried out by a qualified electrician.

NOTE: Once ground wires are connected, carefully tuck all wires and wire nuts into the metal outlet box making sure that the wires are clear of the hemisphere and downrod when positioned in mounting bracket.

8 INSTALLING THE LIGHT KIT

WARNING: BE SURE TO TURN OFF POWER BEFORE INSTALLING.

- Place diffuser (G) onto the fan and turn to secure.

WARNING: Ensure that all connections, set screws and screws are securely tightened before the next step.

9 INSTALLING THE REMOTE CONTROL WALL BRACKET

If desired, the wall bracket can be installed to house the remote control (H).

- Use the screws to secure the wall bracket at the desired mounting location.
- Place the remote control (H) into the wall bracket.

USING THE REMOTE CONTROL

Operation buttons on the remote:

- Light power button: Press to turn the light on or off.
- Dimmer function button: Press and hold to dim or brighten the bulbs to the desired level and then release.
- "0" button: Press to turn the fan off.
- "1" button: Press to turn the fan on and set the fan speed to high.
- "2" button: Press to turn the fan on and set the fan speed to medium.
- "3" button: Press to turn the fan on and set the fan speed to low.

The reverse switch is for Forward/Reverse.
This setting would usually be changed twice per year.

Downdraft in summer to create a wind chill to give a cooling effect.

Updraft in winter to circulate the hot stratified air off the ceiling and back down to the floor without creating a wind chill.

Troubleshooting

Problem	Solution
The fan will not start.	<ul style="list-style-type: none"><input type="checkbox"/> Check wiring connections to fan.<input type="checkbox"/> Check fuses and circuit breakers.<input type="checkbox"/> Check wiring connections in switch housing. CAUTION: Turn power off for last two items.
Fan sounds noisy.	<ul style="list-style-type: none"><input type="checkbox"/> Check to make sure that all screws in motor housing are snug.<input type="checkbox"/> Check to make sure that blade bracket screws are tight.<input type="checkbox"/> Check to make sure that wire nuts in switch housing are not rattling against wall of switch housing.<input type="checkbox"/> If fan has a light kit make sure switch housing screws and set screws are tight.<input type="checkbox"/> Some fan motors are sensitive to signals from solid state variable controls. If solid state controller is used, change to an alternative control.<input type="checkbox"/> Allow a 24-hour break- in period to eliminate most noises.
Fan wobbles or shakes excessively	<ul style="list-style-type: none"><input type="checkbox"/> Check that all blades are screwed firmly into blade brackets<input type="checkbox"/> Check that blade brackets are secured firmly to motor.<input type="checkbox"/> Check distance from tip of blades to ceiling.<input type="checkbox"/> Check distance between blade tip to blade tip. All measurements should be equal. Loosen blade screws and position blade until even then re-tighten.<input type="checkbox"/> Check that the downrod hemisphere notch is engaged in canopy.<input type="checkbox"/> Check to make sure that jam screws in downrod are tightened.<input type="checkbox"/> Make sure canopy and mounting bracket are tightened securely to wooden joist.<input type="checkbox"/> Make sure warpage has not occurred in wooden blades. If so, contact the customer service department for replacement parts.
